

Service Exchange

MMS

MMS wish to advise the addition of SX components to our Services.

How does SX Work for YOU?

Any SX component "in stock" can be dispatched to you on request

Your failed component is returned to MMS for assessment

Final cost is quoted to you once the assessment has been completed.
The component is then repaired and returned to MMS stock

Whats the cost?

There is no cost associated with this service other than the cost of repair

- ~Machining is carried out in-house ensuring a fast turn-around.
- ~We repair barrels, rods, and other components in-house to ensure the cost of your repair is kept to a minimum.
- ~No up-front core fee's or hidden charges

Quality Assurance

Our goal is to supply "as new" components

- ~All components are repaired to the highest standard
- ~We sandblast, prime and repaint to improve corrosion control
- ~All components are pressure tested prior to dispatch
